

ACCURATE[®] VAE RDP

Redispersible Polymer Powder

Technical Data Sheet

Description

ACCURATE 5011N is a free-flowed and water-soluble white powder, produced by spray and dry process mostly based on a hard copolymer of vinyl acetate and ethylene. It dissolves in water easily and forms the membrane, and provides the overall performance in increasing the cohesion, adhesion and flexibility of various substrates.

Product Specifications

| | |
|-------------------------------------|-----------------------------|
| GRADE | ACCURATE 5011N |
| Appearance | White to light beige powder |
| Solid Content | ≥99% |
| Ash content(1000℃) | 12±2 % |
| Packing density (g/l) | 400-600 |
| pH value | 6.0-8.0 |
| Particle size | 90% pass 100 mesh |
| TG (°C) | 10±5 |
| Min Film-forming Temperature (°C) | 4 |
| Type | Rigid |
| Protective colloid | Polyvinyl alcohol |

Recommend Applications

| |
|--------------------------|
| Tile adhesive |
| Wall putty |
| Tile grout |
| Adhesive mortar for EIFS |
| Surface mortar for EIFS |
| Renders/ Plasters |

Typical Properties

| |
|---|
| Dissolves in water easily and forms emulsion quickly |
| Increase the adhesion to all kinds of substrates |
| Improve the abrasion resistance, workability, and anti-permeability for the materials |
| Improve flexural and compressive strength |

Packing & Storage

1. Multi layer paper bag with inner PE film
2. 25kg/bag, 600kg/pallet, 700kg/ pallet or 1300kg/pallet
3. 20' container: 13 Tons, 40' container: 26 Tons (with pallet)
4. Neutral or blank bag available, OEM brand available

5. Store in cool, dry and clean conditions. Due to the thermoplastic nature of redispersible powder, it is not recommended to stack double pallets during storage and transportation. In order to avoid caking, long-term storage in high temperature, high humidity and heavy pressure environments should be avoided. Due to the slight caking caused by poor storage and transportation conditions, if the caking can be crushed into the original powder, it can continue to be used. The shelf life is one year and it is recommended to use the product within 6 months after receiving the goods. If the product is stored longer than recommended, it may still be used but users are advised to verify the properties required for the intended use.
